| 3 | Texture tile considerations for raster graphics William Dungan , Anthony Stenger , George Sutt Proceedings of the Fifth Annual Conference on Computer Graphics and Interactive Techniques on Conference on computer graphics and interactive techniques August 1978 As a technique for rendering texture in images, texture tiles meet the subjective criterion of visual acceptability. A texture tile is a digital array of stored texture information that is replicated on a surface within an image. The purpose is to give the surface a textured appearance. The repetitive pattern inherent in the tiling approach can be suppressed. A texture tile must not exhibit macropatterns to avoid this problem. Properties that the mapping algorithm must include are oriented ... | 77% |

- 4** Feature-based cellular texturing for architectural models 77%
Justin Legakis , Julie Dorsey , Steven Gortler
Proceedings of the 2001 conference on Computer Graphics August 2001
Cellular patterns are all around us, in masonry, tiling, shingles, and many other materials. such patterns, especially in architectural settings, are influenced by geometric features of the underlying shape. Bricks turn corners, stones frame windows and doorways, and patterns on disconnected portions of a building align to achieve a particular aesthetic goal. We present a strategy for feature-based cellular texturing, where the resulting texture is derived from both patterns of cells and t ...
- 5** Fast visualization methods for comparing dynamics 77%
Kay A. Robbins , Michael Gorman
Proceedings of the conference on Visualization 2000 October 2000
- 6** Product Review: Visual SlickEdit: A Commercial Editor for Programmers 77%
Larry Ayers
Linux Journal January 1998
- 7** Parallel lumigraph reconstruction 77%
Peter-Pike Sloan , Charles Hansen
Proceedings of the 1999 IEEE symposium on Parallel visualization and graphics October 1999
This paper presents three techniques for reconstructing Lumigraphs/Lightfields on commercial ccNUMA parallel distributed shared memory computers. The first method is a parallel extension of the software-based method proposed in the Lightfield paper. This expands the ray/two-plane intersection test along the film plane, which effectively becomes scan conversion. The second method extends this idea by using a shear/warp factorization that accelerates rendering. The third technique runs on an ...
- 8** The application of non-periodic tiling patterns in the creation of artistic images 77%
Kenneth A. Huff
Proceedings of the conference on SIGGRAPH 99 : conference abstracts and applications July 1999
- 9** Pattern-based texturing revisited 77%

Fabrice Neyret , Marie-Paule Cani
Proceedings of the SIGGRAPH 1999 annual conference on Computer
graphics July 1999

- 10** Mathematica in action (2nd ed.) 77%
Stan Wagon
Divisible Book, Springer-Verlag New York, Inc. June 1999
- 11** Combinatorics of patterns of a bidimensional Sturmian 77%
sequence.
Laurent Vuillon
Theoretical Computer Science December 1998
Volume 209 Issue 1-2
- 12** Tiling design patterns—a case study using the interpreter 77%
pattern
David H. Lorenz
ACM SIGPLAN Notices , Proceedings of the 1997 ACM SIGPLAN
conference on Object-oriented programming systems, languages and
applications October 1997
Volume 32 Issue 10
- 13** Introduction to computational science and mathematics 77%
Charles F. Van Loan
Book, Jones and Bartlett Publishers, Inc. May 1996
- 14** Tiling and local rank properties of the Morse sequence 77%
S. Ferenczi
Theoretical Computer Science July 1994
Volume 129 Issue 2
- 15** Fractals and chaos 77%
Divisible Book, Springer-Verlag New York, Inc. January 1991
